GROUP 1

PROJECT SCRUM/ FINAL REPORT-OUT

Deran Cross, Zifran Chowdhury, Emmanuel Dairo, Ikechukwu Ogowuihe

THE WHY (PROBLEM)

- Household food management can get disorganized.

- Food items are frequently forgotten and left to expire, creating food and financial waste.

- Lack of resources that bridge the gap between "what I bought," "where to put it," and "when it expires."

THE WHY (OUR REASON FOR CREATING)

- We want to solve the inefficiency of household food management.

- To interpret household inventory information in a new, useful way.

- Help consumers reduce waste and save money.

THE WHO (TARGET AUDIENCE)

- Home cooks and budget-conscious individuals
- Families managing large inventories
- Students
- **Essentially,** anyone who buys groceries and wants to minimize waste

WHAT
(OUR SOLUTION)

KitchenSync 🔄

- An app to input food items and assign storage (pantry, fridge, freezer, etc.) and input its expiry dates.
- Key Feature: Suggest recipes based on items stored in the inventory and nearing expiration dates
- Our Vision:
  - ⋆ Zero-waste kitchen management
  - ⋆ Unnecessary grocery spending is reduced
    - ⋆ Get users in sync with their personal kitchen (as the name suggests!)

OUR DEMO

PROGRAMMING ENVIRONMENT

- MVC Architecture
- Tech Stack: HTML, CSS/Bootstrap, JavaScript, Node.js/Express, MongoDB

OUR MVP & REFLECTION

- What are our achieved MVPs?
  - Input and track food items and expiry
  - Suggest recipes suggestions based on what is in storage
  - Generate, browse, filter, and save recipes
- What did we decide against?
  - Scanning
  - Notifications
  - Automated Expiry
  - Photo Upload
  - Comments
- What are we happy with?
  - Database/API integration, Size
- What do we think could potentially be better?
  - External notification, more personalization

SOME DOCUMENTS & RESOURCES UTILIZED

- Communication Management
  - (Hard to maintain, however we were able to message frequently)
- Project Charter
  - (More potential stakeholders (for potential future growth) - home chefs, food vloggers, grocery stores/delivery service)
- RACI Chart
  - (Lines blurred a bit)

THANKS FOR LISTENING!
